OVPAA-EIDR Form 3.8 EMERGING INTERDISCIPLINARY RESEARCH GRANT Full Proposal Guidelines

Guidelines on completing the entire proposal. Most of the information required will be the same as that of the capsule proposal. Shaded sections ask for more detail than the capsule concept proposal or are new sections.

(Please use font size 12, Times New Roman. Submit <u>all</u> required information and in the sequence and format indicated in these guidelines.) The full proposal must reflect the exchange of ideas on the capsule concept proposal between the reviewers and the proponent.

1. Research proposal title and executive summary.

• Descriptive but concise, indicating the significance, general strategy and methods, and expected outcomes of the proposal.

2. General and Specific aims.

- The General aims pertain to the entire program or project and not just to its component projects (or subprojects). They summarize the expected outcome(s) and the impact that the results of the proposed research will exert on the field(s) and on society.
- Specific aims pertain to projects of a program (or subprojects of a project), e.g., to test a stated hypothesis, create a novel design, solve a specific problem, address a critical barrier to progress in the field, develop new technology and/or business model, make a product.
- 3. **Research/ Artistic Strategy.** *For EVERY project in a multi-project proposal,* organize the Research/ Artistic Strategy in the order specified below. There is no limit to the length of this section. The interactive relationship of projects should be clear.

a. INTRODUCTION

(a) Significance and broad impacts

For research:

- Describe the importance of the problem that the proposed project addresses.
- Explain how the proposed project will improve scientific knowledge, technical capability, culture, and practices or solve a problem in society when the aims are achieved.
- Describe how the concepts, methods, or practices that drive this field or market segment will be changed if the proposed aims are achieved.

For non-written creative work:

- Explain the significance of the artistic issue or cultural gap that the proposed project seeks to address, highlighting its relevance to the community or society at large.
- Discuss how the proposed project will enhance cultural knowledge, artistic practices, and community engagement, as well as its potential to address social issues through creativity, innovation, and artistic expression.

- Detail how the project will influence existing artistic concepts, techniques, or practices within the creative field or market segment, illustrating how achieving the project's aims will lead to innovation and evolution in the arts.
- (b) Innovation and intellectual merit

For research:

- Explain how the application challenges and seeks to shift current paradigms and practices.
- Describe any novel theoretical concepts, approaches or methodologies, instrumentation or interventions to be developed or used, and any advantage over existing methodologies, instrumentation, or interventions.
- Explain any refinements, improvements, or new applications of theoretical concepts, approaches or methodologies, instrumentation, or interventions.

For non-written creative work:

- Discuss how the proposed creative work challenges existing artistic conventions and seeks to shift current practices in the arts, promoting new perspectives and approaches that foster innovation.
- Outline any original artistic concepts, methods, or techniques that will be developed or employed in the project, elaborating on how these innovations provide an advantage over traditional artistic practices or tools.
- Describe any enhancements or new applications of existing artistic theories, approaches, or methods that the project will introduce, highlighting improvements that can elevate the quality and impact of creative work within the field.

b. STRATEGY AND METHODOLOGIES

- Describe the overall strategy and the methodologies (with references) to be used to accomplish the specific aims of the project. Where applicable, include how data will be collected, analyzed, and interpreted as well as any resource sharing plans as appropriate.
- Discuss potential problems, alternative strategies, and benchmarks for success anticipated to achieve the aims.
- Describe any strategy to establish feasibility (to complete the project within the proposed period), and address the management of any high-risk aspects of the proposed work, especially if the project is in the early stages of development.
- Describe clearly the role and functions of the program operations manager in relation to the Main proponent, co-proponents, and various aspects of the proposal.
- Indicate any procedures, situations, or materials that may be hazardous to personnel and precautions to be exercised. Indicate ethics reviews and all permits required to pursue the projects.
- Describe how the project's results will be leveraged to obtain financing for the project's continuation beyond the duration of the grant.

- *c.* GANTT CHART (1 Organizational Chart for a multi-project program proposal where the output of one project is the input of another should appear clearly in the Chart.)
 - Include other types of relational diagrams, organizational and process charts, if necessary. Show clearly the activities and responsibilities of project proponents and time-lines.
- 4. Yearly Expected Results/Output of Project/Program. List and describe in detail all the expected results/outputs of the project/program.

For research:

- **a.** Yearly expected technical results, e.g., prototype, products, processes, protocols, policies, etc.
- **b.** Plans for yearly public dissemination of results, e.g., academic publications (in highquality international peer-reviewed journals), patent/utility model application, copyright, primers, manuals, popular feature articles, e-learning materials (videos, audios), and community-based initiatives to disseminate important findings and breakthroughs to the public
- For non-written creative work:
 - a. Yearly expected creative outputs: Outline the anticipated creative products or accomplishments for each year of the project, such as new artworks, performances, design prototypes, or cultural programs. Highlight how these outputs will showcase the evolution of the project's objectives.
 - b. Plans for annual public engagement and dissemination: Describe strategies for publicly sharing results each year, including exhibitions, performances, publications (such as feature articles, catalogs, or books), educational materials (like workshops and instructional videos), and community outreach initiatives to maximize impact and visibility.

5. Other funding.

- **a.** List other existing funded projects related to this project: program or project title, proponents and collaborators, funding source, amount of funding, funding period.
- **b.** Explain clearly how this proposal relates to the above funded projects.
- 6. **Bibliography.** List of references used in the preparation of this document (including the Review of Literature). (PubMed format)
- 7. **Proponent profiles.** Each proponent (main and co-proponents, operations manager) submits a Biosketch (maximum 2 pages) containing the following:
 - **a.** Educational background (BS, MA/MS, PhD, postdoctoral training): degree, major or specialization, university, graduation/completion date
 - **b.** One paragraph written by each proponent explaining why he/she is competent to be a proponent of this proposal.
 - **c.** For research, the proponent must have at least five peer-reviewed publications/ policy briefs that are adopted or cited, demonstrating the expertise and competence of the proponent to conduct the research/ creative work, indicating at least three (3) of the publications are related to the proposed topics.

For creative works, the proponent must have at least 3 completed successful gallery exhibitions, performances, and concerts that received external jury approval and achieve recognition.

- *d.* State any or no personal or group conflicts of interest in conducting this research/ creative work.
- *e.* Suggest local and international experts who can serve as external reviewers of this proposal; indicate those who should not review the proposal.
- 8. **Budget.** This should not exceed the <u>maximum</u> amount indicated in the EIDR guidelines. The budget must be well planned and refined.
 - **a.** Realistic estimates and justifications for personnel compensation (based on expertise and % effort/time contribution to the projects), equipment and operating expenses must be presented.
 - **b.** Prepare a list of existing equipment and facilities (in the home unit, other UP units or outside UP) accessible to the research group, allocate rental or user fees, if necessary. This form must be signed and certified by the Director/Department Chair/Supervisor of the facility.
 - **c.** Budget must include expenses for publication, public dissemination and IP protection.
 - **d.** Administrative costs are not considered and must be borne by the proponent's unit as counterpart funding.
- 9. *Other project information.* Indicate if there is proprietary information on the project, foreign activities and collaborators and a sustainability plan.

10. Attachments

- a. Thorough Review of Literature (Review for a multi-project proposal organized in sections)
- **b.** Net Present Value/Market Study (for business projects). A business plan and market study is required for the full proposal.
- c. Preliminary Studies as basis for New Applications: If possible, provide a copy of each of 1 to 3 model papers, articles, or product descriptions made by others that are closest to the proposed idea. Discuss preliminary studies or experiences of the proponent(s) pertinent to this application. Present preliminary data, product diagrams, product designs, software algorithms, etc.
- *d. Facilities and equipment. Indicate information on required certifications and list of available facilities and equipment.*

IX. OTHER PROJECT INFORMATION (ensure completeness of this section)

Is proprietary information/privileged information included in the application?

• Yes • No

(Patentable ideas, trade secrets, privileged or confidential commercial or financial information, disclosure of which may harm the applicant, should be included in applications only when such information is necessary to convey an understanding of the proposed project. If the application includes such information, check yes and clearly mark each line or paragraph on the pages containing the proprietary/privileged information with a legend similar to: "The following contains proprietary/privileged information that (name of applicant) requests not be released to persons outside the Government, except for purposes of review and evaluation.)

Does this project involve activities outside the Philippines or foreign collaborators?

• Yes: From where?__

• No

8

Sustainability plan. Describe how the project will be sustained beyond the duration of the grant. Information on the organization, communications, and operations management plans, and documents pertaining to technology transfer, intellectual property and business development may be required in the full proposal. The precise requirements will be determined on a case-tocase basis.

indicate also equipment available for use of the project

RESEARCH PROJECT TITLE

Facilities and other resources (Attach as Annex D)

(This information is used to assess the capability of the organizational resources available to perform the effort proposed. Identify the facilities to be used: Laboratory, Animal, Computer, Office, Clinical and Other. If appropriate, indicate their capacities, pertinent capabilities, relative proximity and extent of availability to the project. Describe only those resources that are directly applicable to the proposed work. Provide any information describing the Other Resources available to the project (e.g., machine shop, electronic shop) and the extent to which they would be available to the project.)

Certifications required (Attach as Annex E)

- Ethics review for use of human samples, animal testing, etc.
- Permits for bioprospecting activities and sample collection
- Institutional biosafety certificates, PNRI certificates, etc.
- Others:

IX. ATTACHMENTS
